

## OPOS Testing Process

1. Open the OPOS program.
2. Open the folder '70307\_V1.0\S Driver2017\OPOS Registry'.
3. Click on the 'OPOSRegistry' executable file.
4. If prompted with a message, click 'Yes' to proceed.
5. The program will open. Click 'Confirm' to complete registry setup.
6. Return to the folder directory.
7. Open the folder 'OPOS\_CCOs\_1.13.001'.
8. Run the 'OPOS Runtime' installation program. After installation, return to the folder directory.
9. Open the 'OPOS Utility' folder.
10. Execute the 'OPOS Utility' program.
11. Once the program opens, it will automatically detect the RTP device and display relevant information.
12. Return to the folder directory.
13. Open the 'OPOS\_Printer' folder.
14. Enter the 'Debug Tool' folder.
15. Run the 'OPOS\_Printer' test program.
16. In the program, click 'Open' to access the Sample Tool.
17. If the printer is correctly installed and connected, clicking 'Ticket' or 'Receipt' will print a test page.
